< ABOUT />

Hi, I'm Emmanuel, a creative, self-taught and design-oriented front-end developer. I believe in crafting user centric web experiences that look amazing without compromising on functionality, usability and accessibility.

< SKILLS />

- Building modern, responsive and interactive websites with **semantic HTML5, CSS3** and maintainable **JavaScript(ES6+)**
- Building modern web apps with **React.js**
- Managing state with **Redux** and **React-Redux**.
- Using **Webpack** to generate minified JavaScript and CSS bundles.
- Deploy and stage websites and apps to **Heroku**, **Netlify**, **GitHub Pages** etc.
- Create UI mockups and prototypes with **Adobe XD**.
- Collaborate with other developers with **Version Control Systems**, such as **Git.**
- Making use of **styled components** to ensure proper componentization of React apps.
- Using **CSS modules** to separate application logic and styling.
- Use of **browser developer tools** to debug and inspect code.
- Fetching and displaying server side data built with **RESTFul APIs**.
- Adhering to best practices to build **progressive web apps**.
- Use of **linting tools** with style guides to adhere to best practices.
- Understanding of **Object Oriented Programming** and **Functional Programming** paradigms.
- Making use of **Command Line Interfaces/terminals** to interact with **CLI tools**.
- Using **audit tools** such as, **Google Lighthouse** to run browser audits.

< PORTFOLIO />

- React Video Caller: October 2020
  A real-time **video calling app** built with **React.js**, E**xpress.js**, S**ocket.io** and the W**ebRTC API**. Deployed and hosted on **Heroku**.

- Portfolio 2.0: August 2020
  A redesign and rebuild of my personal portfolio website built with R**eact.js**. Deployed and hosted on **Netlify**.

- GitHub User Search: June 2020
  A web app that uses the GitHub **API** to fetch GitHub users based on user queries. Built with **React.js**. Hosted on **GitHub pages**.

- AfriContinent Forums: April 2020
